

TREATMENT OF MINORS

All patients below the age of 16 must be accompanied by a person of majority. If the patient is accompanied by a person of majority who is not a legal guardian of the patient, then a legal guardian must inform this office verbally that the accompanying adult has the legal guardian's permission to have the patient examined and treated. The legal guardian must supply the date of birth of a legal guardian to verify identity.

Patients who are between 16 and 18 years of age may be examined without the accompaniment of a person of majority contingent upon there being a signed copy of our "Permission to Have Minor Examined" form in the patient's record.

All minor patients must be accompanied by a legal guardian or an approved person of majority to receive any treatment or procedure performed in this clinic.
